Released on: July 22, 2008, 4:51 am

Press Release Author: **Miracle Fruit World** -  
<http://www.miraclefruitworld.com/>

Industry: [Food & Beverage](#)

**Press Release Summary:** Miracle Fruit berry contains an active glycoprotein which gently binds to the tongue's taste buds, causing bitter and sour foods (such as lemons and limes) consumed later to taste sweet. [Miracle Fruit World](#) is an authorised distributor of genuine Miracle Fruit products (Miracle Fruit tablets and Powder). We pride ourselves on the excellent service and products. We wish to expand our distribution network and we are looking for individuals, agents and distributors worldwide.

Press Release Body: **The Miracle Fruit Plant** (Synsepalum dulcificum) is a plant first documented in 1725 during an excursion to its native West Africa. Local tribes picked the berry from shrubs and chewed it before meals. Why?

The berry contains an active glycoprotein called **Miraculin**. **Miraculin** gently binds to the tongue's taste buds, causing bitter and sour foods (such as lemons and limes) consumed later to taste sweet. This effect

lasts between ten minutes and two hours. It is not a sweetener, and is nothing like artificial sweeteners as Aspartane (which is rumoured to cause cancer). Miracle fruit is 100% natural and has no known adverse side effects (well, lemons taste sweet).

**MiracleFruitWorld** was the first authorised distributor of **Miracle Fruit** products outside Asia (since April 2008) and is currently appointed as exclusive distributor for continental (mainland) Europe. MiraclefruitWorld was the first company world wide to develop and sell English Packaged Miracle fruit tablets.

**MiracleFruitWorld** currently retails **Miracle Fruit** tablets from <http://www.miraclefruitworld.com> (worldwide retail) and will soon open German (Austrian, Swiss), Italian and Spanish (Mexico, Argentina...) sites as well at <http://www.wunderbeere.de>, <http://www.fruttomiracoloso.com/> and <http://www.fruta-milagrosa.com> respectively.

In the future **MiracleFruitWorld.com** wishes to expand its distribution network and is looking for individuals, agents and distributors from all across Europe and Middle East. Being an exclusive distributor, **MiracleFruitWorld.com** can offer the best pricing and service.

**Additional Information**  
**Miracle Fruit is also called Miracle Berry**, Synsepalum dulcificum, Richardella dulcifica, Frutto dei miracoli, Frutto Miracoloso, Fruta maravillosa, Fruto milagro, Fruta de milagro, Frutamilagrosa, Cudowny owoc, Sideroxyton dulcificum, Mirakelfrukten, Mirakelfrukt, Mirakelbær, Mirakelbaer, Wunderbeere and Mirakelbes.

**Miracle Fruit Tablets** are extremely simple to use: just dissolve one tablet on your tongue (as slow as possible) and the effect will last from 10 minutes to 2 hours (depends mostly on what you eat). You can try different sour foods or use a sugar free recipe to prepare your favorite dessert (suitable for diabetics).
