Released on: July 15, 2008, 10:12 am

Press Release Author: **Poseidon Technology Ltd.**

Industry: [Automotive](#)

Press Release Summary: Innovative Car Diagnostic Tools are showing a steady increase in online demand for DIY car enthusiasts and diagnostic vehicle repair shops. With new vehicle technologies DIY vehicle owners and top of the line repair facilities demand a easy to use, quick, and reliable diagnostic scanning tool. Gone are the days when an auto repair person could diagnose a vehicle problem using a timing light to fix the vehicle.

Press Release Body: **Innovative Car Diagnostic Tools** are showing a steady increase in online demand for DIY car enthusiasts and diagnostic vehicle repair shops. With new vehicle technologies DIY vehicle owners and top of the line repair facilities demand a easy to use, quick, and reliable diagnostic scanning tool. Gone are the days when an auto repair person could diagnose a vehicle problem using a timing light to fix the vehicle.

Today's top DIYers and top car repair facilities must be able to read a vehicle's diagnostic trouble codes, live vehicle sensors,

inspection/maintenance system test results to determine the service a vehicle requires. Saving money on costly diagnosis time is a necessity for auto repair facilities. Time is money and the car diagnostic tools available at **One-Stop-Electronics** will save you time so you can fix it right the first time.

With this growing car diagnostic tools demand, **One-Stop-Electronics** has created a car diagnostic tools interface supply website to supply these high end diagnostic needs. One-Stop-Electronics has modified the hardware interface design to support the latest software browser for automotive diagnostics, data acquisition and virtual dashboards.

You will find innovative car diagnostic tools that work with the **On Board Diagnostic - OBDII Solutions**, includes scanner, code reader, key programmer, clear codes, read sensors and service resetting and more!

Available car diagnostic tools for sale on the website include ALDL, BMW Scanner, Carradio Code Calculator, KWP2000, NEC Programmer, SI-Reset, Star Diagnostics, Techopro, and Uniscan. Hot and in demand Interfaces include: Carsort, Chiptuning, ELM, Nissa, Opel, and VAG.

Vehicle Brands include: Audi, Bosch, BMW, Citroen, Chrysler, Fiat, Ferrari, Hyundai, Mercedes, Opel, Renault, Seat, Skoda, and Volkswagen.

Prices are lower than the regular online brand name price since **One-Stop-Electronics** has partnered with several top notch firms to pass their buying power on to you!

All orders offer free shipping and the safe, secure PayPal payment processor.
