Press Release Body:
London, UK
(25/07/2008) –

Payday Power launched recently out of a growing demand for a safe and easy instant cash advance service that is

regulated by government bodies that people in the UK can trust.

There is no arguing with the facts, the credit crunch and rising levels of inflation are hitting the British public's pockets hard with banks becoming stricter making the availability of loans for people with bad credit ratings lower.

Many things such as an unexpected outgoing from a school fee to a car repair bill to even replacing a broken down washing machine can throw a household's finances off course leaving people seriously struggling financially to cover mortgage and bill payments until their next pay cheque arrives.

It doesn't have to be this way though, with **Payday Power's** pay day loans, people can receive an instant cash advance boost the very same day they apply for it. A pay day (or cash advance) loan is a short-term financial fix designed to tide over the borrower until their next pay packet, whereupon they can clear the debt.

Payday Power's easy-to-use and hassle-free service is completely online so there is no need to worry about faxing documents over and a decision is made to your application instantly online.

In addition, **Payday Power** is a completely 'transparent' service so that unlike many of their competitors, their pay day loans come complete with advice on the risks involved in taking out a loan so that effectively these risks are minimised compared to their competitors.

Emily Davidson of credit.com observes, "*Pay day loans can be a good tool for quickly and easily borrowing cash during an emergency if you don't have other financial options.*"
