Press Release Summary: Aeris Communications added an article regarding applications and benefits of commercial vehicle telematics to its website. The article is available for viewing at <http://www.aeris.net/articles/commercial-vehicle-telematics.html>

Press Release Body: San Jose, Calif. – September 17, 2008 – **Aeris® Communications**, the leading wireless communications service provider dedicated exclusively to the Machine-to-Machine (M2M) and telematics marketplace across North America, today announced the company has added an article exploring commercial vehicle telematics to its website.

The article provides an overview of commercial vehicle telematics, a system that utilizes wireless communication to manage remote assets such as vehicles, equipment and personnel. The full article is available for download at <http://www.aeris.net/articles/commercial-vehicle-telematics.html>

When implemented, commercial vehicle telematics can monitor automotive navigation systems, driver behavior, engine statistics, traffic and road conditions, and provide safety and security measures.

The article also includes an overview of practical applications of commercial vehicle telematics such as:

- Computerized Maintenance & Remote Vehicle Diagnostics
- Vehicle Tracking and other location-based services
- Remote Fleet and Asset Management
- Loss Prevention
- Hands-Free Feature Functionality
- Cold-Store Freight Monitoring

Commercial vehicle telematics provide an extremely useful, cost-saving, and liability limiting, logistics management tool for commercial fleets that transport goods or people.

About Aeris Communications, Inc.

Aeris® is the leading wireless communications service provider dedicated exclusively to the Machine-to-Machine (M2M) and Telematics marketplace across North America. Aeris has assembled and seamlessly integrated its top tier carrier partner networks through AerFrame™ to provide customers with simplified, unified, reliable, and even customized network services for M2M and Telematics applications. Since 1992, Aeris has provided value to vehicle telematics customers by lowering the costs associated with development, manufacturing, distribution and operations, all with higher quality of service throughout the vehicle lifecycle..
