We've got an idea...
SAVE YOUR MONEY!

NO SETUP FEES
for hosted Exchange

In today's economy every dollar is important to you and we understand that. You should still be able to take advantage of our best-in-class hosted Exchange service. As a result, we have eliminated our shared and dedicated hosted Exchange set up fees.

SIGN UP TODAY!

Offer expires November 30, 2008. New customers only.

Press Release Body: BURLINGTON, Massachusetts, USA – November 13, 2008 – **123Together.com** – a **mindSHIFT Technologies** company and the leading provider of hosted enterprise-class messaging and collaboration solutions such as [hosted](#)

[Exchange](#)Server 2007 and Windows SharePoint Services 3.0 -- today announced that it has eliminated setup fees for all new customers who sign up for its hosted [Exchange Server](#)service, available immediately.

*"Our goal is to help businesses of all sizes remain profitable despite the current economic downturn," said **Ravi Agarwal, founder and Senior Executive Officer of 123Together.com**, a **mindSHIFT** company. "By eliminating all setup fees for our hosted Exchange Server services, we make it possible for businesses, regardless of their size, to make use of the functionality that this industry-leading, enterprise-class messaging and collaboration application provides without having to incur significant financial expenses or hire additional personnel."*

As a result of the current economic downturn, many small and mid-size businesses (SMBs) are required to decrease overhead, cut operational costs and reallocate existing funds to get the most value from every dollar they spend. At the same time, business owners expect increased productivity and efficiency among their existing employees, with additional human and financial resources unlikely or impossible.

The economic climate has forced SMBs to search for more cost-effective alternatives for critical business applications, such as email, to maximize the effectiveness of existing business resources without having to incur any additional expenses. Hosted software services such as 123Together.com's hosted [Microsoft Exchange Server](#) 2007 have become viable alternatives to in-house email server deployment and can be utilized in exactly the same manner as the in-house application but at a significantly reduced cost.

In order to assist businesses even further and help their employees remain productive, **123Together.com** has eliminated the setup fee requirement for all shared and dedicated hosted Exchange packages and any additional mailboxes activated through the month of November 2008.

Many SMBs do not have the financial or human resources or even the time necessary to deploy Microsoft Exchange Server in-house, as it requires significant investments in hardware and software, training and hiring of IT personnel, as well as around-the-clock server maintenance, monitoring and upgrades. 123Together.com's new special offer makes it possible for SMBs to reap the same benefits from this industry-leading email application as most Fortune 500 companies

but at a significantly reduced cost. It provides employees with anytime, anywhere access to their business e-mail no matter where they may be, as well as 2-way wireless synchronization of mail, calendar, contacts, notes and tasks with most mobile devices, including BlackBerry and Apple iPhone 3G.

In addition, **123Together.com** offers 24x7 live U.S.-based technical support and 24x7 server maintenance, monitoring and upgrades, enabling businesses without an internal technical staff to profit from this service. All hosted Exchange users also receive free Outlook 2007.

123Together.com's offer of no setup fees on all of its hosted Exchange packages is available immediately and continues through the end of November 2008.

About
