## Press Release Summary: BUILDING A SECURE FINANCIAL FUTURE WITHOUT THE STOCK MARKET

Press Release Body: (ALISO VIEJO, CA)—If you've watched the stock market over the last year you've probably wondered how you'll ever find a secure investment that also yields a strong return. The answer may be in the bedrock principals that drive all successful investments.

**James Burns, author of the new book *The 3 Secret Pillars of Wealth: How to Crack Your Wealth Code Using the Tools of the Self-made Billionaires*, believes that a return to sane, long-term investing can help build a strong financial future for anyone.**

*"Too many people have gotten caught up in complex, flash-in-the-pan investment schemes that have made the stock market a volatile and unfriendly place for the average investor," says Burns. "It is absolutely possible to build a nice portfolio through other means."*

Burns says he believes that few people understand the market, which means that when the market collapses and affects people's retirement accounts they are confused and angry.

*"It is vital that people use tried and true methods for understanding and*

*controlling their money,” says Burns. “Budget every month, only borrow money when you’ll use it to make more, and look for opportunities to buy and hold investments you understand.”*

**In The 3 Secret Pillars of Wealth, Burns list some of these non-market investments, including:**

- Investment-grade life insurance
- The overabundance of cheap housing—as long as you are prepared to hold it
- An established business where partners help spread the risk in an LLC
- Commercial real estate, if you are comfortable with the market

*“If you examine your potential investments carefully and understand that a long-term approach is best, you can avoid the stock market,” says Burns. “Just be aware that the market often affects other financial areas, and be prepared to weather a few storms.”*

An attorney and a former member of the United States Marine Corps Force Recon, **James Burns** has two degrees in law and one in taxation and international tax. He has over seventeen years of combined financial, real estate and legal experience.
