## PERCENTAGES

Name Of Edible Seed	Ground Nut Without Husk	Groundnut With Husk	Til	Kardi	Sunflower	Ambadi	Linseed
<b>Oil Yield Per 100 Kgs.</b>	40 – 42%	25 – 32%	40 – 50%	20 - 25%	28 – 35%	20 – 22%	35 – 39%

Name Of Edible Seed	Mustard	Khopra	Jagni	Castor	Cotton
<b>Oil Yield Per 100 Kgs.</b>	34 – 39%	60 – 65%	35 – 38%	32 - 35%	14 – 16%

Name Of Non-Edible Seed	Karanja	Mohwa	Palas	Jathropha	Kusum	Undi	Pissa	Neem Seeds
<b>Oil Yield Per 100 Kgs.</b>	24 – 28%	31 – 38%	08 – 10%	25 - 28%	30 – 34%	50 – 60%	30 – 32%	12 – 16%

### NOTE:-

- 1) The oil extraction percentage entirely depends on the quality and dryness of the seeds.
- 2) It is essential to use boiler for crushing groundnuts without husk and castor seeds.
- 3) Design & specification subject to change without prior notice

Press Release Body: We would like to introduce ourselves as leading manufacturer suppliers & exporter of Mini oil mill plants & other small-scale Machinery for cottage industries.

The firm believes in striving for excellence and constant commitment for innovations and improvements in technology. In fact these constitute the very foundation of the organization. As stated earlier the specialty of the firm has been the sturdy and efficient small oil expellers, Pulverisers, Rice Threshers, Ground-Nut Decorticators etc. Please visit our website-<http://www.rajkumaragromachinery.com> for more information.

Since 1961 we are the pioneers in developing mini oil expeller specialization in expellers running on 3 H.P. to 30H.P. electric motor and crushing capacity from 10Kgs./hr To 300kg/hr.

Products/ Services

MINI OIL EXPELLERS CAPACITY 10 KGSTO 300 KGS/ HR MOTOR  
 REQUIRED 3 HP TO 30 HP BED

Complete M.S. channel sturdy frame bed, also provided with rails for motor. These ensure complete mobility. No foundation required if expeller is run directly with motor. Cost of foundation work & rail for motor is saved.

CI Heavy Duty BODY  
Completely leak proof sturdy steel body in single piece can be expected to be ever lasting yet easy to open with oil bath arrangement.

#### DECORTICATORS

POWER OPERATED JATROPHA DECORTICATOR\  
WITH SHAKER SCREEN

A Power operated machine for shelling jatropha seeds into husks and kemels. The husk and kemels are then separated by blower. Then the seeds divided into two sizes small and big by means of shaker screen. These units are installed for job work or business purpose also for shelling the Jatropha seeds and selling in the market for seed sowing purpose. Breakage limited to 2%

RAJKUMAR MINI FLOUR MILLS  
Mini Flour Mills Runs On Single Phase Electric Motors Ranging From 1 HP TO 3 HP Available In Plain and Third Pedistal Models Size 10" 12" And 14" Capacity 15Kgs TO 55 Kgs Per Hour

#### MULTIPURPOSE

#### PULVERISERS

This Pulveriser is specially designed for wet & dry grinding of all types of materials such as Wet Dal, Rice, Chutney. Wheat Powder, Besan and Herbs etc are also easily powdered to the required mesh. The machine consist of high speed swinging hammers which are hardened and tampered up to the required degree. This Pulveriser has a very long life with minmum wear & tear parts. Oiling and Greasing should be done at regular intervals for smooth operation.

#### MASALA

#### PULVERISERS

Our Company was established in 1961 and have supplied numbers of machineries in Central and South Indian States.

We started manufacturing Pulverisers since 1999 and since then we have developed and designed various models Suitable for Dry/Wet items such as Chillie, Masala, Turmeric, Dhaniya & Amchur Powder etc.

Infrastructure

1. All our products are trial and tested by our trained technicians before despatching the machines to our customers, hence sturdy having long life and less maintenance.
2. Machines are running on complete bearing system (No Bushes) with heavy-duty ball and taper roller bearings.
3. The moving parts are tempered properly to reduce wear and tear by friction, ensuring long and smooth working.

### Quality Control

Simple technology requiring virtually no skills to operate and maintain easy to handle. Crushing of small quantity (even 5 Kg) of edible and non-edible seeds. Creating employment for farmers and cottage industries. High-income generation with minimum investment for small farmers and village industries.
