Press Release Summary: Trelleborg-Viking, Inc is pleased to announce that Phoenix Fire Department has chosen Trelchem VPS-FLASH as their standard Level A ensemble.

Press Release Body: Mansfield, MA – **Trelleborg-Viking, Inc** is pleased to announce that Phoenix Fire Department has chosen **Trelchem VPS-FLASH** as their standard Level A ensemble.

This unique reusable, single skin, one layer suit is made of a new patent pending garment material developed and produced by Trelleborg Protective Products. The material is a combination of specialized rubber and plastic laminates, which together with a special woven fabric forms a strong and flexible material that offers outstanding chemical flash fire protection. Additionally, this material exhibits excellent resistance to abrasion, punctures, tears and superior chemical resistance properties.

The **Trellchem VPS-Flash** is fully certified to NFPA 1991-2005, with both the Flash Fire & Liquefied gas options. In addition, the following benefits come standard with each suit:

- Impact Resistant Hard Visor
- Superior Neoprene closure
- Easy Don/Doff Bayonet Cuff System
- High-Visibility Orange Color
- Anti-Fog Lens (virtually eliminates all condensation!)
- Highest material abrasion resistance

*"The Trellchem VPS-Flash has met all the needs of our next Level A ensemble, which includes being certified to NFPA 1991-2005 with the Flash Fire option." says **Mr. Don Moore, Haz-Mat Program Equipment Manager for Phoenix Fire Department.** "With excellent abrasion & puncture resistance, along with the integrated Anti-Fog lens, unique Bayonet Glove Cuff system and excellent flash protection, this is the Hazmat Suit that will truly protect our members."*

For more information on this suit, or to request a demonstration, feel free to contact Trellchem directly at tvi.usa@trelleborg.com, or call (800)344-4458.
