Industry: [Software](#)

Staten Island, NY (October 13th, 2009) – Today Celerant Technology marks its 10th year in business as a leader in the retail software industry. Since October 13, 1999, Celerant has developed advanced [software for retailers](#) from a variety of locales and vertical markets.

“To celebrate ten years in business is an important milestone for our company and we are very proud to have reached this pinnacle” stated Celerant Technology President and CEO, Ian Goldman. “We are thankful to have employed such a talented and hard working staff of individuals over the years, to develop and maintain every facet of our software, and provide the outstanding customer service we have become known for. Since starting out as a small [retail software](#) provider in Staten Island, NY, we have come a long way, with now 5 satellite offices and 450 clients in various retail markets.”

The Celerant product, Command Retail, manages all areas of a multichannel retail business, from the point of sale on the front end, to inventory management, warehouse, distribution, allocation and advanced reporting on the back end, to seamlessly integrated E-Commerce and mail order/catalog. Celerant Technology has been recognized by several trade publications and continuously receives top scores in industry rankings. This year alone, the RIS News Leaderboard ranked Celerant as the #1 Mid Sized Retail Software vendor and the #4 Overall Top Retail Software, the CPA Advisor recognized Celerant with the highest scores for every category in the annual POS review, the Aberdeen Research Group included Celerant in their Best-in-Class POS Axis Report, and Celerant placed even higher than last year on the Inc. 5,000 List of fastest growing private companies.

“Ten years ago today when Ian and I established Celerant Technology, there wasn’t software like ours on the market,” stated Celerant Technology’s CFO. “We knew that the idea behind the Celerant system would serve as an excellent solution for retailers, but, like any new business, it was difficult to say if our company would be a success. Now, we can say that because we’ve

worked hard over the past decade to produce a high quality product, we've been able to make a highly recognized name for ourselves in the retail software industry. As for the future, I believe that Celerant has the potential for continued growth and I look forward to an even greater level of success in the years to come."

Since starting out as a small Staten Island [software provider](#) in 1999, Celerant has grown in technological advancements and in size, while offering a complete application for retailers. In addition to its main office in Staten Island, Celerant has satellite offices in Georgia, Oklahoma, Florida, Ohio and Washington State. Celerant has over 450 clients with locations across the United States, Canada, and in parts of Europe and the Middle East.

About

Celerant

Technology

Celerant's Command Retail is an advanced real-time retail management system, which manages all areas of retail including POS, Inventory Management, Warehouse, Distribution Center, Allocation, Multi-Channel/E-Commerce/Kiosk, Data Mining, and Back-office, in a single, integrated system. Our advantage is the flexibility of our Java platform, allowing Celerant professionals to conduct cost-effective analysis and adaptation based on the individual needs of each retailer. The result is a better system that meets the needs of retail businesses and gives them the tools to take Command of their success.
