Bev and Ras Robinson's "Convergence" examines the Scriptures in the light of modern scientific knowledge, particularly quantum physics and chemistry, providing a fascinating look at the

place faith plays in the lives of people in our modern age. Bev Robinson's scientific background (she holds degrees in chemistry and

microbiology), Ras Robinson's experience in pastorship (he was the founding pastor of Fort Worth's Fullness in Christ Church) and the couple's shared commitment to their faith inform this work, one which many readers throughout the Austin area will be hoping to receive as a gift this Christmas season.

Vance Russell is well known as the founder of Arise Christian Fellowship, with ministries located in Austin and San Antonio, Texas. His new book "Victory at the Gates" follows the philosophy that Russell has always espoused; establishing a personal relationship with God which allows for spiritual growth in integration with the personal goals of every person of faith. Examining a variety of topics and providing an entirely new insight into the Scriptures, "Victory at the Gates" is a book that anyone with even a casual interest in Christianity will not want to miss.
