Nuremberg. FLABEG, the international [glass finishing](#) specialist, now provides its customers with even more transparency. With the formation of FLABEG Deutschland GmbH the company will concentrate its key competences in the field of automotive and technical glass, in future FLABEG GmbH will focus simultaneously on the development of the [solar mirror](#) business.

"The significant expansion of our worldwide business locations made it necessary to re-organize our key competences," said Axel Buchholz, CEO of the FLABEG Group, explaining the new structure. The automotive and technical glass divisions will operate under the umbrella of FLABEG Deutschland GmbH. The mission: to create a powerful, flexible center of competence for partners in the automotive, consumer electronics and aerospace industries.

For FLABEG customers the pooling of expertise in the solar mirror business and the automotive, technical glass has distinct advantages. FLABEG provides its partners from consulting to support up to the individual precision solution all from one source. "Even with expansion, it is important for us to retain the flexibility and structure of a medium-sized company," said Axel Buchholz. "Utilizing the concentrated development expertise of our all locations, we are able to produce tailor-made high-tech glass products for our customers in a timely manner. A key competitive advantage for [FLABEG](#) customers."

FLABEG, founded in 1882, is an independent company with production facilities in Europe, America and Asia. FLABEG is an expert in all types of glass processing. Precision bending and coating are among the core competencies of the company.
