*Drug and alcohol addiction is a problem that numerous families deal with on a daily basis. In many cases, drug abusers and alcoholics will not be able to overcome their addictions on their own and will need professional help in addition to support from their friends and family. Research shows that the drug rehab programs with the highest success rates start with Narconon. [Narconon Vistabay](#) has the changed the lives of thousands of people.*

Lake Tahoe, Calif., December, 2009 When drug use and alcohol use interfere with family, work, and social activities, it's time to seek treatment from a successful addiction recovery center. Drug and alcohol addiction are serious issues that need to be addressed with the help of professionals who can help the addict recover and live a productive life as a sober individual. Narconon is the addiction recovery program with the highest success rate, over other types of alcohol and drug addiction treatment program options. The Narconon approach uses holistic methods to detoxify the body of all the harmful toxins that alcohol and drugs introduced to it, and it replenishes vitamins and minerals that are key to good health.

Drug abuse comes in many forms, whether it is cocaine, marijuana, hallucinogens, crystal meth or even prescription medication. All cause damage to your liver, kidneys, brain, and lungs. The sooner an addiction is addressed, the less damage will be done and the more ill effects can be reversed. Even if the addict has been using drugs for 30 years, sobriety will help slow down if not stop the damage that has occurred from the alcohol and drugs that they put into their bodies. Narconon Vistabay is able to provide professional care for their clients throughout the recovery process. From detox to graduation, the counselors and staff will do what it takes to help an addict recover and feel good about leaving their rehabilitation ready to start a new life, without drugs and alcohol.

One past graduate has this to say about the Narconon program: "Freedom is a precious gift. All the technology we are learning here will help us live a free life. The program doesn't work unless it is applied and followed in life. I value myself, my freedom, and my group. I already know that the program works and it has saved my life as I know it has for others." -J.A. Narconon Graduate

Narconon Vista Bay is located in S. Lake Tahoe amongst the beauty of nature and has amenities that make it feel less like an alcohol and drug rehabilitation center and more like a retreat. For more than 30 years, the Narconon program has helped countless numbers of people worldwide successfully overcome their addictions to drugs and alcohol. By using a holistic approach to addiction treatment, addicts are able to overcome their addictions without becoming addicted to another substance.

If there is a need for addiction recovery, choice matters. There are many methods of addiction therapy and what may work for one, may not work for another. If a drug-free holistic approach to addiction recovery is what is desired, the Narconon program has the highest success rate for long-term recovery. If you have questions about [Narconon](#) and how the program works, please visit [VistaBay.com](#) or [CalNarconon.Org](#), where you'll also find out more about [Narconon Vista bay](#), its surroundings, the amenities and the programs that a person expect; Call 800-556-8885 if you would like to speak to a counselor.
