RICHMOND, KY – Eastern Kentucky University’s College of Justice & Safety is proud to announce the official launch of its new video blog <http://firevideos.eku.edu>, specifically for the Fire & Safety Engineering Technology Online Bachelor’s Degree Program. In addition to providing prospective students and working professionals with video content pertaining to the fire industry, the Vlog also features course lectures from the EKU fire science program.

“Our degree program at EKU has always offered the sophisticated technical knowledge and skills needed to excel in the emergency

services field, and now we are able to use this same sophistication to share our program information through the Vlog,” said James Pharr, program director.

This video blog, which will be updated regularly with additional video content, is a dynamic resource for the entire fire industry. Visitors will be able to access video based on categories that align with the ECU Fire & Safety Engineering Technology degree program courses, and they will also be able to add their comments about the videos to spur discussion among industry professionals.

ECU will also use the launch of the video blog (<http://firevideos.eku.edu>) as its forte into social media, sending Vlog updates to followers through:

- Twitter: <http://twitter.com/ekufiresafety>
- Facebook: <http://www.facebook.com/pages/ekufirescience/170281136295>
- YouTube: <http://www.youtube.com/FireScienceEKU>

ECU’s Fire & Safety Engineering Technology Online Bachelor’s Degree Program prepares fire industry professionals for future advancement in their careers. This degree program includes two critical concentrations: Fire Administration and Fire Protection Engineering Technology. Eastern Kentucky University is regionally accredited by the Southern Association of Colleges and Schools (SACS) and enjoys many national rankings, including the top 10 percent of universities by Forbes Magazine and as a Tier I institution by US News and World Report.
