SARASOTA, Fla., May 21, 2010—Visual Applications, Inc., a developer of visualization software applications for the home improvement and landscape industry, recently launched Showoff.com, an interactive community for home and garden enthusiasts and businesses alike.

Termed the Home and Garden Hub, Showoff brings products straight to the homes of interested customers where visitors can shop for ideas, products and services from the comforts of home and receive support from experts in the home industry. Consumers "try on" products using the Visualizer, a free online tool that allows users to upload their own photographs to visualize any home improvement project in minutes including landscape, remodeling and interior design projects.

Showoff provides a place for contractors, manufacturers, dealers and designers to showcase their products and services for users to browse in places like the Product Showcase and Portfolio Gallery. Landscape and remodeling contractors, designers, and other industry professionals can get in front of a captive audience by uploading photos of their own work into the Portfolio Gallery for customers to peruse.

Showoff.com is the creation of Bobbie Dreis-Ayers, a veteran of visualization software development. "The goal of Showoff.com was to marry the needs of consumers and businesses into a site that worked for both parties," says Dreis-Ayers. "We are incredibly excited about the launch of Showoff.com and hope that this site will become a fitting room of sorts for the consumer and an important sales channel for participating businesses."
